**CATALYTIC BURNER ELEMENT INSIDE A FUEL CELL WITH STRUCTURED
CATALYTIC COATED SURFACES**

Examiner: Yuan S.N. 10/044,526 Art Unit: 1745 August 25, 2003

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a burner element, classified in class D26, subclass 114.
 - II. Claims 24-27, drawn to a catalyst-coated plate, classified in class 60, subclass 723.
 - III. Claims 28-30, drawn to a process for controlling the reaction in a burner element, classified in class 431, subclass 2+.

2. Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process (MPEP § 806.05(e)). As admitted by the applicant, the burner element can be operated by two distinct methods as stated in claims 28-29 and 30, respectively.

3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

inventions have different functions. Invention II can be used in conjunction with a catalytic converter in a vehicle.

4. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention:

I-1, Claims 1-19 are drawn to a burner element consisting of at least two plates arranged essentially parallel to each other.

I-2, Claims 20-23 are drawn to a burner element that is essentially four-sided in top view.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

5. If invention III is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention:

III-1, Claims 28-29, drawn to a process for controlling the endothermic reforming reactions wherein the control is accomplished at least partially by introducing diluting air into the reaction chamber.

III-2, Claims 20-23, drawn to a process for controlling the endothermic reforming reactions wherein the control is accomplished by varying the total quantity of the constituents supplied.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

6. Applicant is advised that a reply to this requirement must include an identification of the invention/species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1745

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
